Chapter 13

1. Swagger

# Hospital API

1.0.0OAS 3.0

API for hospitals (demo)

Servers

http://localhost:5000/api/v1

## Hospitals

The hospitals managing API

GET

/hospitals

Returns the list of all the hospitals

POST

/hospitals

Create a new hospital

GET

/hospitals/{id}

Get the hospital by id

PUT

/hospitals/{id}

Update the hospital by the id

DELETE

/hospitals/{id}

Remove the hospital by id

2. Get Hospitals from Swagger

The screenshot shows a web browser window with the address bar displaying "localhost:5000/api-docs/#/Hospitals/get\_hospitals". The page title is "Responses".

The main content area is divided into several sections:

- Curl**: A dark box containing the following command:

```
curl -X 'GET' \  
  'http://localhost:5000/api/v1/hospitals' \  
  -H 'accept: application/json'
```
- Request URL**: A dark box containing the URL:

```
http://localhost:5000/api/v1/hospitals
```
- Server response**: This section has two tabs: "Code" and "Details".
  - The **Code** tab is active, showing a status code of **200**.
  - The **Response body** is displayed in a dark box with the following JSON data:

```
{  
  "success": true,  
  "count": 1,  
  "pagination": {},  
  "data": [  
    {  
      "_id": "68c98407dad3c7b751c325fe",  
      "name": "Alice McDermott",  
      "address": "Changwattana Pakkret",  
      "district": "Pakkret",  
      "province": "Nonthaburi",  
      "postalcode": "10110",  
      "tel": "02-8369999",  
      "region": "à.Òà.Èà.à.à'Êà.-à.Ëà.à.à.'à.à.'à..à.É (Bangkok)",  
      "__v": 0,  
      "appointments": [],  
      "id": "68c98407dad3c7b751c325fe"  
    }  
  ]  
}
```
  - A **Download** button is visible next to the response body.
- Response headers**: A dark box at the bottom showing the header:

```
access-control-allow-origin: *
```
